

## May 2010

Strategic tourism marketing and policy decisions depend on accurate, consistent tracking of business indicators such as lodging statistics, attraction and welcome center visitation, transportation statistics and more. The intent of the North Carolina Travel Tracker is to provide up-to-date and relevant tourism indicators for both the state and individual regions within the state. With data from the Travel Tracker, program areas and industry partners can strategically plan, implement and evaluate processes and programs.

The following report analyzes a variety of tourism indicators by 1) State, 2) the three geographic marketing regions (coastal, piedmont and mountain), and for some indicators 3) the seven economic development regions. As well as providing a review of the current state of business, the report provides a year-to-date analysis and comparisons to previous years where applicable.

With regards to the lodging data found in this report; while virtually every chain in the United States provides Smith Travel Research (STR) with data on almost all of their properties, there are still some hotels that don't submit data. However, every year STR examines listings and directories for information on hotels that don't provide data. STR calls each hotel in the database every year to obtain "published" rates for multiple categories. Based on this information all hotels are grouped - those that report data and those that don't - into groupings based off of price level and geographic proximity. They then estimate the non-respondents based on nearby hotels with similar price levels.

Following is a guide to charts and graphs for this report:

### **Section 1 - Statewide Tourism Indicator Analysis for May 2010**

- Chart 1 – Hotel/Motel Occupancy in North Carolina May 2006 – 2010
- Chart 2 – Hotel/Motel Average Daily Room Rate in North Carolina May 2006 – 2010
- Chart 3 – Hotel/Motel Revenue per Available Room in North Carolina May 2006 – 2010
- Chart 4 – Hotel/Motel Room Demand in North Carolina May 2006 – 2010
- Chart 5 – North Carolina Lodging Statistics Monthly Percent Change 2008 – 2010
- Chart 6 – Statewide Visitation to Attractions May 2006 – 2010
- Chart 7 – Statewide Visitation to Attractions Monthly History 2006 – 2010
- Chart 8 – State Welcome Center and Local Visitor Center Attendance May 2006 – 2010
- Chart 9 – Statewide National and State Park Visitation May 2006 – 2010
- Chart 10 – Statewide Visitation to State Parks Monthly History 2006 – 2010
- Chart 11 – Statewide Visitation to National Parks Monthly History 2006 – 2010
- Chart 12 – Statewide Airport Arrivals and Departures May 2006 – 2010
- Chart 13 – Lower Atlantic Average Monthly Retail Gas Prices for Unleaded May 2006 – 2010
- Chart 14 – North Carolina Average Temperature and Precipitation May 2008 – 2010

### **Section 2 – Geographic Marketing Region Tourism Indicator Analysis for May 2010**

- Chart 15 – Hotel/Motel Statistics by Geographic Region May 2010
- Chart 16 – Hotel/Motel Room Demand by Geographic Region May 2010
- Chart 17 – Visitation to Attractions and Parks by Geographic Region – May 2010
- Chart 18 – State Welcome Center & Local Visitor Center Attendance by Geographic Region – May 2010
- Chart 19 – Airport Arrivals and Departures by Geographic Region – May 2010

### **Section 3 – Economic Development Region Tourism Indicator Analysis for May 2010**

- Chart 20 – Hotel/Motel Statistics by Economic Development Region May 2010
- Chart 21 – Hotel/Motel Room Demand by Economic Development Region May 2010

### **Section 4 – National Travel Price Index**

- Chart 22 - National Travel Price Index December 2006 – May 2010

## Section 1: Statewide Tourism Indicator Analysis for May 2010

Chart 1 – Hotel/Motel Occupancy in North Carolina - May 2006 – 2010

Chart 1 provides a comparison over a five year period to show the trend of occupancy in the state for the month of May. Occupancy for May 2010 was up 8.7 percent from May 2009. This followed a good April, continuing a trend of positive occupancy data for 2010. *Occupancy at the national level increased by seven percent (+7.1%) in May 2010 from the previous year.*

Chart 2 – Hotel/Motel Average Daily Room Rate in North Carolina - May 2006 – 2010

Chart 2 provides a comparison over a five year period to show the trend of average daily room rate (ADR) in the state for the month of May. After peaking in May 2008, ADR for past two years has decreased over 7 percent, and is still just below 2007 levels. *ADR at the national level was flat in May 2010 from the previous May.*

Chart 3 – Hotel/Motel Revenue per Available Room in North Carolina - May 2006 – 2010

In Chart 3 an analysis of Revenue per Available Room (RevPAR) is provided. RevPAR is an industry term that describes the revenue that a hotel earns on the basis of just the rooms available for a given night. In other words, rooms not available either due to renovation or other reasons are not included in this equation. Mathematically, RevPAR can be determined dividing total room revenue by rooms available (occupancy times average room rate will closely approximate RevPAR).

As with previous charts, Chart 3 shows a comparison over a five year period to show the trend of RevPAR in the state for the month of May. RevPAR was up in May 2010, continuing the positive growth that started in March. *RevPAR at the national level was up 7.1% in May 2010 from the previous May.*

Chart 4 – Hotel/Motel Room Demand in North Carolina – May 2006 – 2010

Chart 4 depicts hotel/motel demand for the month of May 2010 with comparisons to the previous four years. Demand is the number of rooms sold excluding complimentary rooms. Room demand for May was up 11.7% from May 2009, and up just over flat (+0.3%) from 2008. *Room Demand at the national level saw an increase of 9.6% change in May 2010 from the previous May.*

Chart 5 – North Carolina Lodging Statistics Monthly Percent Change 2008 – 2010

Chart 5 provides a monthly percent change for the four major lodging indicators. The chart allows for an 18 month trend-line analysis that clearly depicts that the major indicators show a steady negative change. After over a year of negative percent change for all indicators, occupancy and demand has shown relative increases the last few months. As well, RevPAR finally moved above 0% increase in March and continued positive growth in April. ADR still lags, though better than any month in the last year in terms of growth.

Chart 6 – Statewide Visitation to Attractions - May 2006 – 2010

Chart 6 provides a status of the attractions industry in North Carolina for the month of May for the last five years. The numbers represent only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis, particularly when tracking percent change. Missing values for attractions who regularly report have been estimated until visitation can be verified. These estimates are not included in percent change calculations from May 2009 to May 2010.

There was a decrease of almost three percent in attraction visitation from May 2009 to May 2010.

Chart 7 – Statewide Visitation to Attractions Monthly History 2006 – 2010

Chart 7 shows a monthly trend of attraction visitation for each of the last five years. This chart allows for a view of the ebb and flow of monthly attraction attendance, while also providing a look at how attendance compares to the same month of the previous years. Not surprisingly, the summer months see higher visitation numbers at statewide attractions. However, it is helpful to view how visitation is allocated by month for strategic planning purposes.

Again, the numbers represent only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis.

May 2010 attendance was below the past few Mays of the last five years, but still well above 2006 levels.

Chart 8 – State Welcome Center and Local Visitor Center Attendance - May 2006 – 2010

Chart 8 provides May visitation statistics for State Welcome Centers, as well as Local Visitor Centers throughout North Carolina. It should be noted that while there is a percent change indicated for welcome centers for 2007-2008 and 2008-2009, 2008 was the first year a percent change could accurately be provided. The NCDOT spent several years changing the counting mechanism at the state welcome centers making comparisons between years inaccurate from the time the DOT began installation until December 2008. Therefore, previous years' percent changes are not included in this particular chart.

Chart 9 – Statewide National and State Park Visitation - May 2006 – 2010

Chart 9 depicts visitation to state and national parks in North Carolina for the last five years months of May. Both state and national parks experienced decreases from May of 2009.

**Chart 10 – Statewide Visitation to State Parks Monthly History 2006 – 2010**

Similar to Chart 7, Charts 10 and 11 provide a monthly trend of state and national park visitation for each of the last five years. These charts help monitor the flow of monthly attraction attendance, while also providing a look at how attendance compares to the same month of the previous years. It is important to note that there are many extraneous variables that can affect visitation at attractions, and particularly at outdoor attractions. Weather, temperature and holidays are variables that should be noted when viewing unusual highs or lows in attendance.

**Chart 11 – Statewide Visitation to National Parks Monthly History 2006 – 2010**

Chart 12 – Statewide Airport Arrivals and Departures - May 2006 – 2010

Chart 12 shows May airport arrivals and departures for each of the previous five years. The arrivals and departures increased statewide from last May, and there has been a positive five-year increase in both for the month of May.

Chart 13 – Lower Atlantic Average Monthly Retail Gas Prices for Unleaded – May 2006 – 2010

Chart 13 provides the average price per gallon of unleaded gasoline for May 2010 and the same month from the four previous years. The data provided above, when compared with other indicators such as attraction attendance and visitor spending data, can be very helpful in the analysis of general travel trends. Fuel prices in May 2010 were up significantly from last May, though still well below 2008 prices.

Chart 14 – North Carolina Average Temperature and Precipitation – May 2009 – 2010

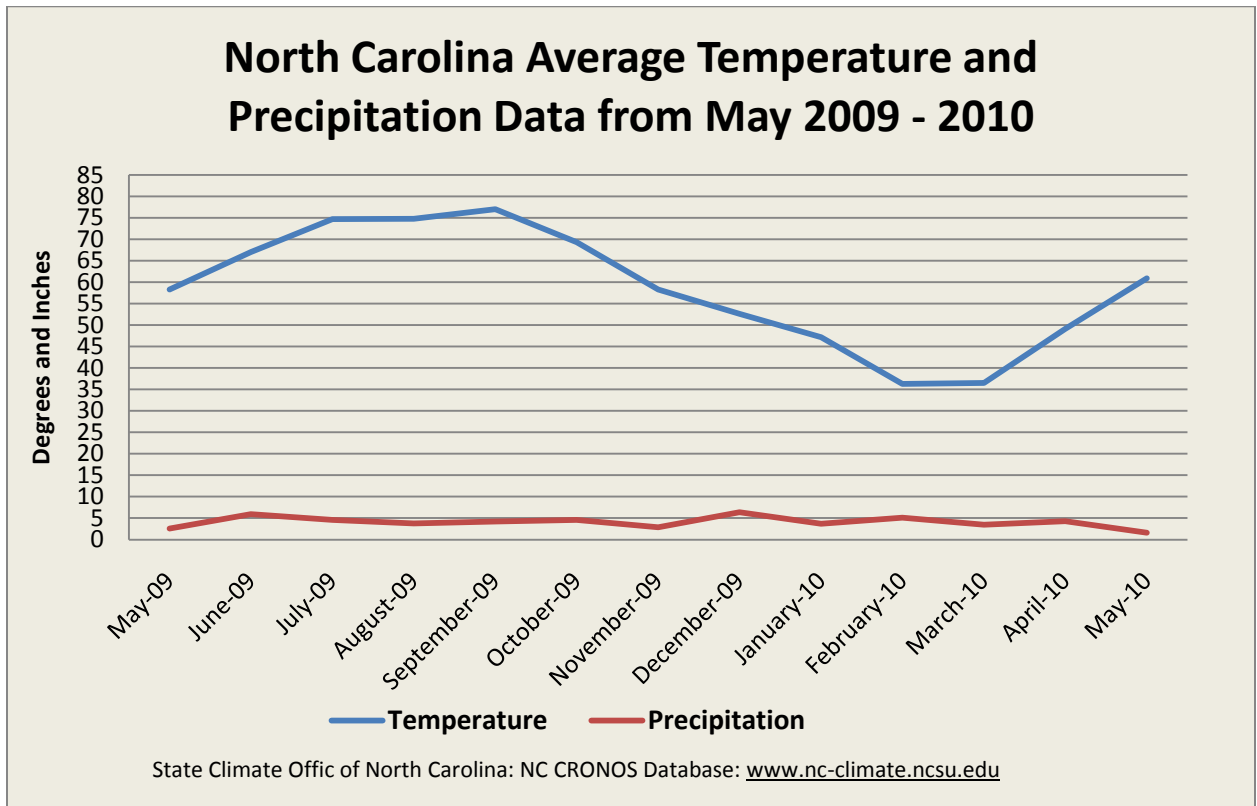

Chart 14 provides 13 months of air temperature and precipitation. This data, when analyzed together with gas price data and other tourism indicators, can be valuable in determining possible reasons for significant increases and/or decreases in indicators. For instance, greater than normal precipitation during a particular month can often help explain decreases in attendance at outdoor attractions.

May 2010 had slightly higher average temperature than 2009, and there was about an inch less precipitation in May 2010 than 2009.

**Section 2 – Geographic Marketing Region (Coastal/Piedmont/Mountain) Tourism Indicator Analysis for May 2010**

**Chart 15 – Hotel/Motel Statistics by Geographic Region - May 2010**

Chart 15 provides a one year comparison in lodging statistics for the three geographic marketing regions of North Carolina in May. Occupancy and RevPAR in May 2010 increased in all three regions, but ADR still lags very slightly in all three regions.

Chart 16 – Hotel/Motel Room Demand by Geographic Region - May 2010

Chart 16 provides hotel/motel demand by geographic region for May 2010. Demand differs from occupancy in that it is the total number of rooms sold, not accounting for differences in room supply. The Piedmont Region experienced an almost thirteen percent positive change in demand from May 2009 to May 2010, and the other regions also showed healthy demand increases from May 2009.

Chart 17 – Visitation to Attractions and Parks by Geographic Region – May 2010

Chart 17 provides a look at the attractions industry in North Carolina in May 2010 by geographic region. As with the statewide numbers, the following data represents only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis.

The Mountain Region showed an increase in attraction attendance as compared to last May. However, the Coastal and Piedmont regions experienced a difficult month in terms of attractions and park attendance. State Park attendance took a big hit in the Piedmont Region from May 2009 to May 2010, but was up in the Mountain region in 2010.

Chart 18 – State Welcome Center and Local Visitor Center Attendance by Geographic Region – May 2010

Chart 18 shows welcome center and visitor center attendance by geographic region and offers comparisons from May 2009. All regions experienced increases from May 2009, but the Coastal Region saw a significant increase in welcome center numbers in May.

Chart 19 – Airport Arrivals and Departures by Geographic Region – May 2010

Chart 19 provides a breakdown of air travel statistics by geographic region. While the majority of air traffic is through the Piedmont Region, it is helpful to maintain a trend of other regional airport usage. The Mountain Region showed strong growth of almost twenty percent in air traffic during the month of May, while the other regions saw smaller, but still positive, increases from last year.

### Section 3: Economic Development Region Tourism Indicator Analysis – May 2010

The seven economic regions include:

- 1 – Northeast (Bertie, Camden, Chowan, Currituck, Gates, Halifax, Hertford, Northampton, Pasquotank, Perquimans, Beaufort, Dare, Hyde, Martin, Tyrrell, Washington).
- 2 – Eastern (Carteret, Craven, Jones, Onslow, Pamlico, Duplin, Edgecombe, Green, Lenoir, Nash, Pitt, Wayne, Wilson).
- 3 – Southeast (Brunswick, Columbus, New Hanover, Pender, Bladen, Cumberland, Hoke, Richmond, Robeson, Sampson, Scotland).
- 4 – Triangle (Franklin, Harnett, Johnston, Vance, Wake, Warren, Chatham, Durham, Granville, Lee, Moore, Orange, Person).
- 5 – Triad (Alamance, Caswell, Guilford, Montgomery, Randolph, Rockingham, Davidson, Davie, Forsyth, Stokes, Surry, Yadkin).
- 6 – Carolinas (Alexander, Catawba, Cleveland, Iredell, Rowan, Anson, Cabarrus, Gaston, Lincoln, Mecklenburg, Stanly, Union).
- 7 – Western (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Polk, Rutherford, Swain, Transylvania, Watauga, Wilkes, Yancey).

Chart 20 – Hotel/Motel Statistics by Economic Development Region - May 2010

Chart 20 provides lodging indicators for May 2010 by economic development region. Also shown are percent changes from May 2009. This graph allows individual regions within the state to track indicators specific to their general destinations, while still being able to compare their data to the state data shown in Section 1.

Chart 21 – Hotel/Motel Room Demand by Economic Development Region - May 2010

Chart 21 depicts hotel/motel demand for the month of May 2010 by economic development region. Demand is the number of rooms sold excluding complimentary rooms. All regions showed increased demand from May 2009 to 2010. Four regions had increases of over ten percent in demand from April 2009 to April 2010.

## Section 4: National Travel Price Index

The Travel Price Index (TPI) measures the seasonally unadjusted inflation rate of the cost of travel away from home in the United States. The TPI is based on U.S. Department of Labor price data collected for the monthly Consumer Price Index (CPI). The TPI is released monthly and is directly comparable to the CPI.

### Variables included in calculating the TPI:

Recreation Services	Food Away from Home	Airline Fares
Food and Beverage	Other Lodging (Include Hotel/Motel)	Intra-city Public Transportation
Alcohol Away From Home	Transportation	Motor Fuel
		Other Intercity Transportation

Chart 22 – National Travel Price Index December 2006 – May 2010

Chart 22 provides a two year trend of the National Travel Price Index (TPI). Steady growth was experienced through mid-2008; however in November 2008, it is clear that as the TPI fell below 2007 levels, the tourism industry began feeling the full effect of the recession. Into 2009, the TPI remained slightly at or below the 2007 level, though for the last two months of 2009 peaked above the 2008 index. Into March 2010 the TPI is still slightly below the same time period in 2008, but above 2007 and 2009.
